EDUCATION

Rai University

bachelor of Technologies

- First Sem CGPA : 9.76

PROJECTS

FinCtrl :

Roles: Public users track finances; admins manage user roles and visibility.

Features:

- Public users can share financial data and view profiles.
- Admins can control user visibility, remove users, and invest on users' behalf.
- Manage finances with event-specific budgets and receive financial guidance.

Technical Focus: Clean UI/UX design, role-based access control, and data security for sensitive information.

Cloning Projects

- Apollo Clone: Recreated Apollo's UI, focusing on design and interactivity using [technologies like HTML , CSS].
- Nintendo Clone: Built a Nintendo-themed game/app, replicating gameplay and UI using [technologies like html , css].
- PorgCap Clone: Recreated PorgCap's interface and features, focusing on design and functionality using [technologies like React.js, CSS].
